the Challenge

From the atom to the sun... the universe pulsates with energy in many forms.

The challenge is to find ways... new ways... to utilize the earth's vast storehouse of fuels in providing the energy needed for this nation to continue to be great.

The means—innovative technologies, exotic engineering, dynamic architecture—exciting advances that must come if man is to tap Nature's lode for the energies he needs.

From the smallest part of the universe to the largest... that's the scope of the energy field today. The opportunity for personal achievement is infinite; the challenge, one that must be met.

We believe in the beauty of a pure world untouched by man's carelessness.
We believe that despite all fears, man survives.
We believe that in every night a light of hope shines.
We believe that in a storm a smile breaks through.
We believe that friendship means loyalty, trust, caring and sharing.
We believe in the brotherhood that binds all races and nations.
We believe in freedom for all men in bondage, whether mental or physical.
We believe that each soul needs a tranquil force in order to survive.
We believe in peace, an eternal bond, to bridge all gaps.
We believe that every man is obligated to feel compassion for his neighbor.
We believe in the right of nonconformity for each generation.
But most of all we believe in one another.

CONGRATULATIONS TO THE CLASS OF '77!
